Setting Up WPA security on a Linksys router.

1) In your browser, type "192.168.1.1" (you do not need to type in anything else such as "http://" or "www"). Then press the "Enter" key.

2) Login to your router default username: admin default password: admin

Prompt	Enter username and User Name: admin Password: ***** Use Password M	password for "WRT54G" at lanager to remember this p DK Cancel	: http://	/192.16 d.	68.1.1

4) Setting WPA/WPA2

Select "WPA Pre-Shared Key" from the "Security Mode" drop down box.

Set WPA Algorithms to TKIP

Enter your pre-shared key. This can be from eight to 63 characters and can be letters, numbers, or symbols. This same key must be used on all of the clients that you set up.

This pre-shared key will allow users full access to your network including shared files and printers.

Click "Save Settings" to finish. You must now set all clients to match these settings depending on the type of access you want them to have.
